Hi

I am not sure where claim 34 would be classified.

However, I think claims 1 and 7 would be classified in 524 - 524/492.

Callie

Hi!

I am wondering if you can help me classify some of the claims in 10/736,321 for restriction purposes. I think they may belong in class 106, but I'm not sure.

Claim 1 reads:

Claim 7 (which I believe I would group with claim 1) reads:

The "surface patch" is applied in a liquid state according to paragraph [0030] of the spec., so it's really a coating composition.

Finally, there are the kit claims:

If any or all of these belong in class 106, great! If not, would you please suggest an alternative home?

Thanks!
